

### S-HTS to Homicidity Category Coding Mapping Table

Homicidity Classification Code Number	Homicidity Classification Category	Did event code occur during this coding interval?	# of times event occurred	How S-HTS questions map to each HC category
1	Completed homicide	Yes or No		A yes response to 19
2	Homicide attempt (Potentially injurious behavior associated with some intent to kill. Intent can be stated or inferred by rater.)	Yes or No	From 26	Any positive response to 16 or A “Yes” response to 1b
3	Preparatory acts toward imminent homicidal behavior (Person takes steps to injure or kill someone but is stopped by self or other. Intent to kill is either stated or inferred.)	Yes or No	From 25	Any positive response to 14
4	Homicidal ideation (Passive thoughts about wanting to kill or active thoughts about killing someone, not accompanied by preparatory behavior.)	Yes or No	Sum of times from questions 2 + 3	Any positive response to 2 or 3 or 4 or 5 or 6 or 7 or 8 or 9 or 10 or 11 or 12 or 13
5	Injurious behavior towards another, intent unknown (Injurious behavior where associated intent to kill is unknown and cannot be inferred.)	Yes or No		A positive response to 1a with 1b and 11 and 12 and 16 unanswered
6	Not enough information (fatal)	Yes or No		A yes response to 20
7	Injurious behavior towards another, no homicidal intent	Yes or No	From 13	A positive response to 15 or A positive response to 1a and negative responses to 1b
8	Other accidental or medical harm to another, but not deliberate harm to another	Yes or No		A positive or blank response to 1 and A negative response to questions 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 19 and 20.
9	Not enough information (non fatal)	Yes or No		Code HCC # 9 if there is missing or incomplete information on S-HTS beyond the explicit S-HTS rules above to allow mapping to codes 1-8 in HCC. Use information from all sources in coding.

Note: Items 7 & 8 on S-HTS (“plan for homicide”) is construed as not going beyond ideas or verbalizations of a plan for homicide. If actual preparatory behaviors occur (i.e., buying a gun or taking other steps – see item 12 on S-HTS), the event should be regarded as “preparatory behavior” and coded as Code Number 3. If information from the S-HTS is coded as an adverse event in a research study, classify the adverse event by the category number and category name when naming the adverse event. A “negative response” means a score of zero on that question, while a “positive response” means a score of  $\geq 1$  on that question.

### S-HTS to Homicidity Category Coding Mapping Table

<b>Homicidity Classification Code Number</b>	<b>Homicidity Classification Category</b>	<b>Did event code occur during this coding interval?</b>	<b># of times event occurred</b>	<b>How S-HTS questions map to each HC category</b>
<b>10</b>	Completed homicide & suicide combined	Yes or No		A yes response to 19 (from the Homicidity & Suicidity Combined Scale)
<b>11</b>	Homicide & suicide attempt combined as a unit (Potentially injurious behavior associated with some intent to kill another and oneself at or around the same time. Intent can be stated or inferred by rater.)	Yes or No	From 26	Any positive response to 16 (from the Homicidity & Suicidity Combined Scale) or A "Yes" response to 1b (from the Homicidity & Suicidity Combined Scale)
<b>12</b>	Preparatory acts toward imminent combined homicidal and suicidal behavior (Person takes steps to injure or kill someone but is stopped by self or other. Intent to kill is either stated or inferred.)	Yes or No	From 25	Any positive response to both 14 (from the Homicidity & Suicidity Combined Scale)
<b>13</b>	Combined homicidal and suicidal ideation (Passive thoughts about wanting to kill or active thoughts about combined killing self and someone, not accompanied by preparatory behavior.)	Yes or No	Sum of times from questions 17 + 18	Any positive response to 2 or 3 or 4 or 5 or 6 or 7 or 8 or 9 or 10 or 11 or 12 or 13 (from the Homicidity & Suicidity Combined Scale)
<b>14</b>	Injurious behavior towards another and self combined, intent unknown (Injurious behavior where associated intent to kill is unknown and cannot be inferred.)	Yes or No		A positive response to 1a with 1b and 3 and 15 and 16 unanswered (from the Homicidity & Suicidity Combined Scale)
<b>15</b>	Injurious behavior towards another and self combined, no homicidal intent	Yes or No	From 27	A positive response to 15 (from the Homicidity & Suicidity Combined Scale) or A positive response to 1a and a negative responses to 1b (from the Homicidity & Suicidity Combined Scale)
